

Cappasity 3D and 360 Product Viewer User & Installation Guide

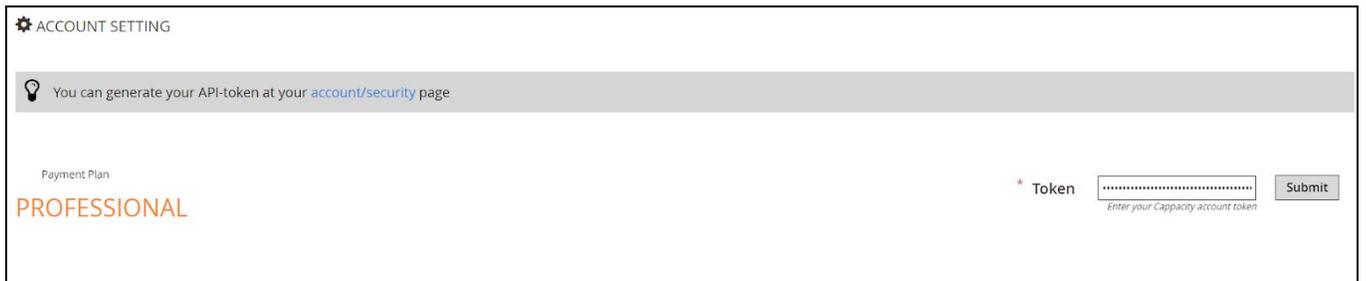

1. [Install the extension](#)
2. [Input security token](#)
3. [Embed 3D Views into product pages](#)
 - A. [Automatic synchronization](#)
 - B. [Embed 3D Views manually](#)
4. [3D View player settings](#)

[Support](#)

1. Install the extension

Please refer to [this guide](#) to learn how to install extensions via Magento Extension Manager.

2. Security token

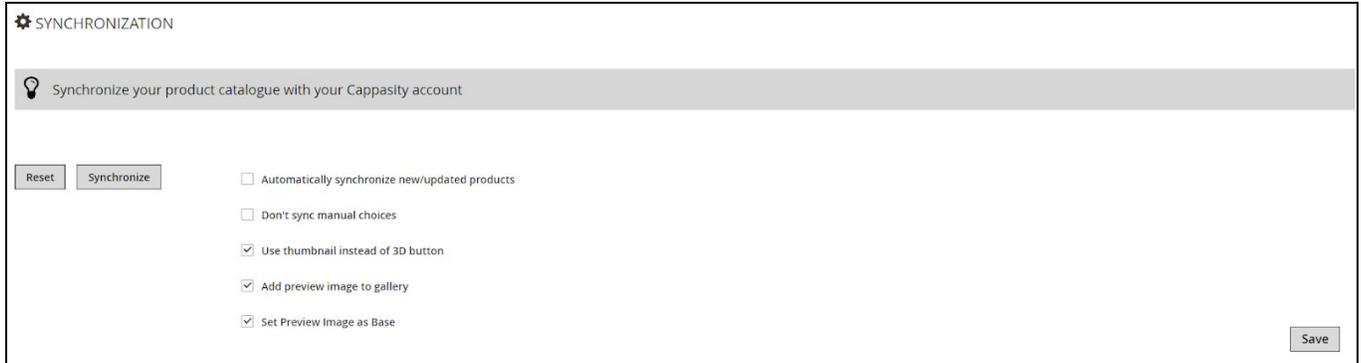

The screenshot shows the 'ACCOUNT SETTING' page. At the top, there is a gear icon and the text 'ACCOUNT SETTING'. Below that, a light gray banner contains a lightbulb icon and the text 'You can generate your API-token at your [account/security](#) page'. The main content area shows 'Payment Plan' with 'PROFESSIONAL' in orange text. To the right, there is a form field labeled '* Token' with a placeholder 'Enter your Cappasity account token' and a 'Submit' button.

To connect the extension with your Cappasity account you should input a unique security token.

- 1) To get the token, [log in](#) to your account on the Cappasity platform (if you don't have it yet, please sign up [here](#)). Go to the **Account** settings - **Security** tab.
- 2) Create the name for the token and click **Generate** then **Copy**.
- 3) Paste the copied code into the **Token** field and click **Submit**.

3. Embed 3D Views into product pages

A. Automatic synchronization

The screenshot shows the 'SYNCHRONIZATION' settings page. At the top, there is a gear icon and the text 'SYNCHRONIZATION'. Below this is a lightbulb icon and the text 'Synchronize your product catalogue with your Cappasity account'. There are two buttons: 'Reset' and 'Synchronize'. To the right of these buttons are five checkboxes with labels: 'Automatically synchronize new/updated products' (unchecked), 'Don't sync manual choices' (unchecked), 'Use thumbnail instead of 3D button' (checked), 'Add preview image to gallery' (checked), and 'Set Preview Image as Base' (checked). A 'Save' button is located in the bottom right corner.

To embed product 3D Views into the relevant product pages automatically, you need to run Synchronization.

- 1) Before starting the synchronization, please make sure that you have uploaded all 3D Views that you want to embed into the product pages to your Cappasity account. You can do that via the [Easy 3D Scan](#) software or Cappasity App.
- 2) Check that 3D Views have the same SKU numbers as the products on your Magento store.
- 3) Go to the Cappasity extension settings and set the synchronization parameters:
 - Tick **Automatically synchronize new/updated products** if you want the extension to automatically add 3D Views to all newly created or edited products.
 - Tick **Don't synchronize manual choices** if you don't want to overwrite the 3D Views that you [embedded manually](#).
 - **Use thumbnail instead of the 3D button** option places a 3D image thumbnail instead of a standard 3D button on the product page.
 - Select **Add preview image to gallery** to add 3D View to the list of all images, or **Set preview image as base** to set the 3D View as the main product image.
- 4) Click the **Synchronization** button. Once the synchronization is complete, you can see the 3D Views on the product pages.

If you want to remove all 3D Views from product pages and delete the security token, click **Reset**.

B. Embed 3D Views manually

Choose From Picker
Yes [global]

Enter SKU

First 1 2 3 Last

Skus: 112233 Sku: 12346 Sku: 5100025724694444 Sku: 1234r

Cancel Save

Set thumbnail instead of 3D button Use global rule

Manual embedding allows you to pick a 3D View from your account for each product page separately. To do so:

- 1) Open the product page in the Magento Admin. On the product page, open the **3D View** tab. You will be shown a list of your latest 3D Views.
- 2) Select the 3D View you want to attach to this product from the list or enter its SKU number to embed the 3D View from your Cappasity account.
- 3) Choose the setting for the product showcase:
 - Choose **Use global rule** to embed the 3D View with the default settings.
 - Tick **Use thumbnail instead of the 3D button** option places a 3D image thumbnail instead of a standard 3D button on the product page.
 - Select **Use 3D button** to show the 3D button in the products' gallery.
- 4) Click **Save**.

4. 3D View player settings

3D View player settings

Autorun Autorotate Analytics Hide settings button

Show logo Wraparound time, sec Show close button Hide fullscreen button

Enable zoom Rotation freeze, sec Hide zoom button Horizontal (left, right) padding

Zoom quality Autorotate direction Hide autorotate button Vertical (top, bottom) padding

Save

3D View player settings allow you to adjust the way a 3D View appears to your customers on the product page. You can set up UI paddings, auto-start, etc. Learn more about the player configurations [here](#).

Some of the player parameters are available on the Cappasity paid subscription plans only. You can upgrade your subscription plan anytime. See our pricing options [here](#).
